PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Give an introduction in which you just tell us about the germs which can be found on IUDs if they stay for a long duration and if possible associate the germ to each type of IUD. Otherwise, the text is ok.	Thank you for the comments. The most common infection related to insertion or manipulation of an intrauterine device is pelvic inflammatory disease, and the microorganisms most frequently involved are <i>Chlamydia trachomatis</i> , <i>Neisseria gonorrhoeae</i> or <i>Escherichia coli</i> , among others. There is no association to a specific germ with a type of IUD.
<u>Minor</u> REVISION comments	NONE	OK
<u>Optional/General</u> comments	NONE	OK
