PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	1. Were there only two cases in the study period? 2. How two cases were selected? 3. How the health facility was selected? 4. What was the period of the study? 5. How the skill of injection givers was determined?	1. The Paper was reports of unusual complication of Injection abscess and are rare, therefore may not be found many. The main reasons why they are reported as case study and not to deny the world community of health Practioners that rare things still occur today, these information is invaluable for knowledge. 2. They were not selected but only cases that has presented with this type of presentation hence they are case reports 3. These paper is not large research studies but special case reports 4. The cases presented in 2016 to the health facility and therefore date has been reported inclusively to the paper. 5. The skill of giver was determined by the history report of the patients who opt for injection from untrained medicine store seller and also from Non doctor or Nurse. Internationally these are non-licensed recognised Givers.
Minor REVISION comments	1. What does CSM stand for? 2. There are several brand names used in the manuscript eg.augmentin, septrin, flagyl , what do they stand for ? (Generic names?)	CSM has been put in full and all other brand names turned to generic names and in yellow
Optional/General comments	1. It needs language and spelling corrections	I have also review some sentences and spelling errors , Thank you for your kind effort shown to review this manuscripts.
