Type of Article:	Case study

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Most of the references (nine of the sixteen cited) are more than 15 years old, which invalidates the authors' argument that "The entities and pictures are new and rear.	I would welcome any link or paper whose injection abscess seem similar in presentation, However I still did more searching and I have not seen pathology process of this sort that has been published and readily accessible to readers, dermatologist pathologist alike. This paper also show that organisms are more virulent with antibiotic resistant increase. The world would welcome seeing what happen in poor resource countries.
