SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	1- Why the authors chose only 150 patients? And with kind of calculation was carried out to identify the controls? 2- Infection of <i>Mycobacterium tuberculosis</i> has been a public health problem in all Nigeria, why this study was carried out in this Hospital? 3- Line 316-318, the authors don't explain why the haemoglobin concentration for pulmonary tuberculosis patients was significantly lower than that of control subjects. 4- The findings are good but are not well discussed, according with other findings in many similar studies. 5- The objective of this study is not clear, thereby, the conclusion doesn't seem to be aligned with the objective. 6- Tables nr 1-3, are not well represented making difficult the interpretation	
Minor REVISION comments		
Optional/General comments
