**SDI Review Form 1.6**

**PART 1: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments		
<b><u>Minor</u></b> REVISION comments	It is a good paper but I think this paper is not a research article, (there is no obvious question to be resolved with this manuscript). I do not have background comments, The paper is clear, concrete and the correlations are well discussed. It may be very good to correlate the active molecules of each of the extracts to see if there is a similarity in their structure or if they are present in most of the same. As way suggestions: FDA is not Food and Drugs Authority of Ghana. The legends of Figures 3 and 4 should be improved as they are incomplete.	
<b><u>Optional/General</u></b> comments
