PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	My recommendation is for the material and methods section. Could you clarify how many participants were engaged in the training/ could you also add a flow diagram of the components of your program 9eg, how many sites, number of trainers and participants at each site, how long was the training, was there a drop out of participants, any long term follow-up?)	
Minor REVISION comments	none	
Optional/General comments	Very important concept.
