SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	See attached corrected manuscript.	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	The innovative part of the study is linking infection to history of miscarriage; however, the study has no specific objective. Toxoplasmosis is a common infection among pregnant women in Nigeria and many developing countries and many studies have been carried out on the infection. The study would have been more interesting if the questionnaire had included questions on possible source of infection and level of education of the sampled women.
