SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Under the 'materials and method' the materials should be merged appropriately with the sample collection and preparation, sensitivity testing. Results: Since there is a table presenting the results explaining the table in the text is a repetition Discussion: Mutation of the organism chromosome was not determined in this study and the resistance level observed does not indicate this, so comparing this in percentage with previous study is not necessary (last paragraph)	
<u>Minor</u> REVISION comments	Small sample size The location of the sampling was not stated (are the table tops from offices or wards, are they staff or patients' hands?) MIC and MBC are for which antibiotics, cefoxitin? Also the unit for the various dilution concentration was not stated. In Table 1, the key to RD was not included.	
<u>Optional/General</u> comments
