

SDI Review Form 1.6

Journal Name:	International Journal of TROPICAL DISEASE & Health
Manuscript Number:	Ms_IJTDH_35340
Title of the Manuscript:	The Prevalence of Malaria Infection Among Patients Attending the Health Centre of the Federal University of Technology, Akure, Nigeria
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, corrects the manuscript and highlights that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	The inference made from the findings are over stretched outside the scope of the study, More details should be added to the area of study, the gap this study is filling and its implication for the target population. The discussion left some answered questions especially with the use of probable terms. The background should bring out the crux of the study, on why the study has to be done (statement of problem) to warrant the study because Malaria is a known endemic disease. Because before the beginning of the article I already know the results; so bring out the selling point of the article and articulate it in the abstract too.	
Optional/General comments	The article is precise and good	

Reviewer Details:
