

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of TROPICAL DISEASE & Health
Manuscript Number:	Ms_IJTDH_35340
Title of the Manuscript:	The Prevalence of Malaria Infection Among Patients Attending the Health Centre of the Federal University of Technology, Akure, Nigeria
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
You have a good work Most government intervention focuses on 1 to 5 years; the finding from the study points to the need for a new pragmatic strategy which is age group focused given the prevalence at all ages and effective at all season. In your discussion; you mentioned Premonition as a possible cause of steep in October, genotype as a possible cause in gender variation etc, all these factors where not assessed in your questionnaire and where not tested and they are raising unanswered questions in your discussion; you are expected to simply describe the result and mention its implication without overstretching the inference like the example above.
