PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	1. The cause of spread of ebola virus during last outbreak(2014-2016) is not well established. In Guinea, Sierra Leone and Liberia the political situation is not so different to that occurring in Sudan , Congo.. , there was not civilian war.. but unfortunately the number of victims infected by ebola virus was very high. The authors must explain why the viral strain did not play any role in virus diffusion. 2. No specific indication on health infrastructure have been done in different countries considered in the paper	
Minor REVISION comments	The reference should be properly revised (i.e ref 25..)	
Optional/General comments
