PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The manuscript is revised as per the suggestion. However there are still minor mistakes in the manuscript that have been marked in the text. Authors reported the <i>Fasciola hepatica</i> and <i>F. buski</i>, No where in the discussion part explored the route cause of infection, How they identified the eggs at species level, atleast provide the figures of the ova/cyst along with the measurement. Authors response Species level was not identify as corrections have been effected. Then they must only write the genus level. Still in the revised manuscript species level have been mentioned.
