	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	I just reviewed this article about nutrition on congenital heart diseases and I remained very happy with it. All the features examined are adequate. There was a perfect methodology that gets reliable results and conclusions. Same results were encountered in other institutions that make it more reliable. I think it is ready to be published the way it is written.
