Journal Name:	International Journal of TROPICAL DISEASE & Health

Title of the Manuscript:	Short Term Outcome of Malaria at Rwanda Level 2 Hospital Bria in Central African Republic: A Cross-sectional study
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The authors did not revise the manuscript properly. A few minor revisions were taken into account in the revised version of their paper. However, many serious major revisions I outlined previously were not taken into account. Indeed, the authors' comments to all my recommendations, referred to as "Corrected" in the feedback form, witness that my recommendations were unhelpful to them. Thus, I strongly recommend to authors to carefully revise their manuscript and respond item-by-item to my recommendations as well as to highlight them within the manuscript.
