

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of TROPICAL DISEASE & Health
Manuscript Number:	Ms_IJTDH_38284
Title of the Manuscript:	Pyo- adipocytolytic -necrosis subcutis and Pan-necrotizing subcutis: Unusual dermatopathological entities , complications of Injection abscess given by unskilled personnels- Management and Outcome.
Type of Article:	Case study

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The modifications and corrections made by the authors led to a slight improvement in the quality of the manuscript. However, this is still not enough for it to be considered suitable for publication. Most of the references (nine of the sixteen cited) are more than 15 years old, which invalidates the authors' argument that "The entities and pictures are new and rear. Injection abscess may be a little common but not further complication as these". There is no information new or different from that already existing in the international literature.
