

Editor's Comment:

Editorial comments	Authors' response
<p>My review is from the Revised-ms ... 6 Sep 2018:</p> <p>1. Line 137-139 ... Prior suggestion was a rewrite of this sentence. It now reads, <i>"It was found that sufficient vitamin D store has promoting protective role particularly if the mother got adequate vitamin consumption during pregnancy."</i> Suggest the following rewrite ... It was found that sufficient vitamin D content, promotes a protective role, particularly if the mother received adequate vitamin D consumption during pregnancy.</p>	

Revision was noted. However, I have suggested a rewrite mentioned above, pursuant to accepting this manuscript.
