Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Ethical issues Ethical issues which are very crucial have not been mentioned here.	First of all we would like to thank you for your patience and valuable review and suggestions. I mentioned the ethical clearance by the institute in the document now. I already submitted the EC form.
Minor REVISION comments	- Line 57 requires reference - Line 77 should read ... with reference to carbapenem and colistin antibiotic resistance. - Line 101, replace 'is' with 'was' - Lines 165-167 should be expunged from result section as it forms part of materials and methods - There is no difference between Fig 2 and Tab 3. One of them should be removed. - The same applies to Tab 4 and 5, and Fig 3. All confer the same information - Fig 4 and 5 and Tab 7 do not contribute any relevant information and should be expunged The concluding section should be revised to bring out the good scientific knowledge obtained from this work.	Yes I agreed for all the corrections. I made all the changes in the document and highlighted the corrected portions.
Optional/General comments
