New Title of the Manuscript:	Assessment of physico-chemical and bacteriological status of sachet water consumed in the Hohoe municipality of Ghana
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Good effort by the author (s) and only very minor changes in the form of deletion and addition of some words/ headings. I have added an additional paragraph of study objectives; please check on the attached revised manuscript. I have highlighted all deletion and addition with red & blue colour - on the revised manuscript, as attached.	Thank you very much for your final comments. All corrections are done and highlighted in the revised manuscript. Please, although the Authors revised the script with regards to the Evaluator's comments, we have few concerns: Abstract With reference to the Authors Guideline for this journal (IJTDH), the fourth statement under 'Abstract' states "Different sub-sections, as given below, should be used". Unfortunately these sub-sections [Background and aim; Study design; Place and duration of study; Methodology; Results; Conclusion] which MUST be used under 'Abstract' were now deleted by the Evaluator. However, we effected the changes as recommended by the Evaluator. Furthermore, should the Evaluator change his mind, the initial Abstract format which complied with the guideline and well-outlined can be maintained. Please, we are not challenging the decision by the Evaluator but we are just raising a concern.
