Title of the Manuscript:	How safe is sachet water consumption in the Hohoe municipality of Ghana?
New Title of the Manuscript:	Assessment of physico-chemical and bacteriological status of sachet water consumed in the Hohoe municipality of Ghana
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Based on the authors' comments the topic can be rephrased thus: An Assessment of some Physico-Chemical Properties and Bacteriological Status of Sachet Water Consumed in Hohoe Municipality, Ghana. I prefer arranging references by Alphabetical order followed by Year of publication. As per the guideline of editorial office we have followed VANCOUVER reference style for our paper. Kindly see the following link: http://sciencedomain.org/archives/20	Thank you very much for your comments. The topic is rephrased as recommended. Please, could this refer to the in-text referencing or the bibliography? By judgment we decided to look at the combined in-text referencing and this was duly corrected throughout the manuscript. For example: Reference 1 and 2 interchanged (in-text and bibliography). We thought the Evaluator could help by being specific pointing a reference not in conformity to the guideline and also the name of the paper. However, we crosschecked all the 27 references cited in our manuscript and did corrections.
