PART 1: **Review Comments**

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	**1) Authors should refrain from using abbreviations in the manuscript without mentioning the full form at the first instance.** **2) Sample size determination has not been mentioned. A sample of 40 patients seems too small for showing the relationship.** **3) SPSS version, origin and software details needs to be mentioned.** **4) Tables 1 to 6 needs proper title. The titles are bizarre and there are no foot notes. Tests used in each table and significance of p value needs to be mentioned.** **5) Results of each table needs to be presented in detail.** **6) IMRAD pattern needs to be followed in abstract and in the text part.** **7) Table 1 has some errors in the values like range and SD. Authors needs to present table 1 in a represented way. Its looks bizarre.**	1- I accept and corrected 2- I accept and i will consider number in future study 3- SPSS was explained in ref. No 5 4- All tables were corrected 5- I corrected all table 6- I accept 7- corrected
Minor REVISION comments		
Optional/General comments
