

SDI Review Form 1.6

Journal Name:	International Journal of TROPICAL DISEASE & Health
Manuscript Number:	Ms_IJTDH_38942
Title of the Manuscript:	Aspects of Climatic and Socioeconomic Parameters and Malaria Prevalence; Evidence from Nigeria
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Is a very interesting work, especially because the Projected Incidence is very alarming. I think in the discussion It deserves more consideration. In the Figure 2 Trend of Climatic Parameters, it is based on Mean annual rainfall and Main maximum temperature, one is volume of water and the other is Temperature. I suggest in left "Y" axis can appear the values for volume of water (mm) and in the right "Y" axis (in the same figure) can appear the values for temperature (celsius), other wise is very difficult to understand both values as one unit in the same axis. In other hand, in spite all the statistical measures, how to explain if we overlap the three figures (1,2,3), the situations between 1999-2001 and 2009-2013, where the National Poverty level for instances decreased.	- This has been elaborated as suggested. - Done, and it has actually enhanced a proper interpretation of the figure - This was not given much attention because of the independent variables, the national poverty level was the least predictor of malaria prevalence in the study area.
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
