PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Article is good but need to revise in tables for calculating P value you have to calculate out of total male patients how many defaulted, same for female. Eg male defaulted 42/389= 10.79% Female 30/297=10.10% than no significant difference. So please correct all places.	Ok noted
Minor REVISION comments		
Optional/General comments	Some references no written according to Vancouver style.	

As per the guideline of editorial office we have followed VANCOUVER reference style for our paper.
