SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The subject falls in the scope of the journal and the research is pertinent The structure need a profound revision: the discussion should be 2/3 of all the other section: introduction, method, results The results section is very short compared to a too detailed method section. (All those measurements are standard, are not and do not need to be describe thoroughly) Give a well detailed results section Normal value if known should be shown in the table about measurement of cholesterol What percentage of persons had elevated cholesterol? LDL? They should better express the relation in number between elevation in the lipid profile value and in obese and non-obese The authors have not pay attention to present the results in a standard fashion. These should be clearly shown , the tables should be revised, and the comments well presented, always give international values SOME REFERENCES TO STUDIES DONE IN AFRICA WOULD BE APRECIATED Example: Vicky Jocelyne Ama Moor, Sylvie Ndongo Amougou, Sebastien Ombotto, Felicien Ntone, Doriane Edna Wouamba, Bernadette Ngo Nonga. Dyslipidemia in patients with cardiovascular risk and disease at the University Teaching Hospital of Yaoundé, Cameroon. International Journal of Vascular Medicine 2017; https://doi.org/10.1155/2017/6061306 . Ngo Nonga Bernadette, Mballa Amougou JC, Ntone Enyime F, Ndongo S, Ouankou C, Handy Eone D, Ombotto S, Ngongang J. Prevalence of significant carotid stenosis and other risk factors in patients with acute ischemic stroke in Yaounde, Cameroon. <i>Journal of Vascular Medicine and Surgery</i> 2016. http://dx.doi.org/10.4172/2329-6925.1000257.	Thanks Data analysis was repeated; data was categorised based on gender and BMI. Reference intervals now stated. Frequencies of dyslipidaemia stated. Result section rearranged. Reference number 27 was introduced as suggested.
Minor REVISION comments		
Optional/General comments
