

SDI Review Form 1.6

Journal Name:	International Journal of TROPICAL DISEASE & Health
Manuscript Number:	Ms_IJTDH_39649
Title of the Manuscript:	Multiorgan Failure Associated with Epstein-Barr viremia-An elusive diagnosis: A Case series
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	1.The key point is that the diagnosis of pathogen "EBV" 2.How about the accurate of SES panel? 3.And the relationship between the disease activities and EBV positive, IgG IgM positive?	1.Yes,the key point of thinking about virulence of EBV was evidence of EBV viremia. 2.SES(Syndrome evaluation system) is a patented technology involving three step process which comprises of: Nucleic acid extraction, Multiplex amplification of virulence specific genes of all probable causative pathogens And Sequence specific hybridization.The reporting tim is less (7 hrs),sensitivity is 80%,specificity 100% ,requires low volume sample and has advantage of multiple pathogen detection. 3.In case 1 serology was not done as we got the report after patient succumbed to herillness.In case 2 IgG serology was positive and suggest reactivation of infection .serology was negative in case 3 which suggests primary infection.
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
