SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	Abstract: 1- There is no any result about the effect size in this study. How did you find it? If you have the effect size please adds it. Keywords: Please add "systematic review" Methodology: 1- Firs paragraph needs reference. How did you develop 6 steps? 2- Why did you only focus on English and Spanish papers? 3- Please clarify the exact search dates (beginning and end of search day and month). 4- How did you categorize the levels of quality of scientific evidence? Please add a reference. 5- Where did you use the keywords in databases when you did search? In title, abstract or full text? 6- Please explain the details of reviewing the papers. How many steps? Only reviewing the title and abstracts? How about the full text? 7- Did you remove the duplicated papers after using the listed databases? 8- Did you review all the bibliography of found papers to include in the analysis? 9- How did you choose these databases? 10- Who has reviewed the quality of the papers? Only one person is done it? 11- Please list all the keywords were used for searching through the databases? 12- What is the definition of older adults? Is it considered based on the age only? 13- Please include the data extraction sheet for the papers as a table. 14- Please include a diagram showing trend of search and also reviewing the papers. 15- Please explain the method was used to analysis the data. Results: 1- There is no any result of effect size. Discussion: There is no discussion in the paper	Abstract 1.- It was not calculate. Methodology: 1.- Reference in yellow 2- The focus was Spanish and Enbglish because articles in the databases were in English and Spanih. The articles in anothers languages were excluded because because tehy were not the specific criteria in key words. 3.- The search began October 2016 until february 2017. 4.- Levels of quality were the reported in Primo J. Niveles de evidencia y grados de recomendación (I/II). Enfermedad Inflamatoria Intestinal al día 2003; 7(2) 40-42. Avaliable in: http://www.svpd.org/mbe/niveles-grados.pdf 5.-Key words in title and abstract. 6.- Corrected. In yellow in corrected text. 7- Yes, the duplicated papers were removed. 8. The bibliographic search was focused in instruments that were applied in the intervention. 9.- Because are databases of high quality. 10. The first review was for PI and then corroborated by co-authors 11.- 1 Intervention, 2.- alcohol, 3.- elderly, 4.-systematic review 12.- The definition was used from WHO and Mexican Official Norm NOM-031-SSA3-2012. 13.- It was a table of Word and included in the results. 14- It is included as figure 1 15.- The data was not analyzed by biostatistics methods. Results 1.- It was not calculate the effect size, because all included studies performed a different statistical analysis. Discussion. It was write together with results (there is in the template of the journal)
Optional/General comments		Thanks for your comments and your time
