Title of the Manuscript:	USE OF INSECTICIDE-TREATED BEDNETS AMONG PEOPLE LIVING WITH HIV/AIDS ACCESSING CARE IN A TERTIARY HEALTH FACILITY IN SOUTHWEST, NIGERIA
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	1. Study need to be well defined, other parameters such as occupation, educational status can be included, the analysed parameters can be put to one table and presented better 2. Revisit citations and references 3. IRB OR ETHICAL APPROVAL STATEMENT NEEDED	1. At enrolment into the free HAART-scheme, certain demographic data, like occupation, education were either not captured at all or only captured for few of the subjects. This study is a retrospective one 2. Citation and references revisited as suggested 3. This study did not involve any contact with humans or their clinical specimens, also the data retrieval process from the data archive excluded the identity of the subjects
Minor REVISION comments	Use of selective language in published work required, I recommend a senior colleague should make some corrections on this paper. i.e. marriage between malaria and HIV	
Optional/General comments	Tables not good enough, Good attempt anyway, but it looks as if author is in hurry,
