PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	Introduction: 1. please mention prevalence of low birth weight baby in Nigeria and also number of death of newborn especially low birth weight Methods 1. author mentioned that participant in this study were health workers that attend conference in Nigeria, but it said that the conference was attended not only by Nigerian health worker but also from outside Nigeria. Did you exclude the health workers that did not work in Nigeria? 2. please mention sampling method Results 1. author mention that 87.9% respondent work in tertiary institution, will it be more qualified if the respondent were health worker from primary helath care bcause KMC will be more useful in primary health care rather than tertiary 2. please explain why author did not continue to multivariate analysis Discussion 1. from the data found that there were good attitude and knowledge about KMC, can yiu relate it to number of death of low birth weight baby in nigeria?	Mentioned and highlighted. No one was excluded. All participants were given consent forms and questionnaires and those that consented and participated in the study made up the sample size. Convenience sampling. Highlighted in text. True, however, given the situation in our country, KMC is useful in at all levels of healthcare. Multivariate analysis added please. Mentioned and highlighted in conclusion. KMC is just one of the methods that can help reduce the neonatal mortality rate in Nigeria as there are diverse causes.
Optional/General comments
