FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The revised submission certainly reads a lot better and is more focussed The reference to the article that was 'not found' by the authors is referenced as below: J Family Community Med. 2005 Sep-Dec; 12(3): 145–148. Would expect slight changes in the layout to feature in the discussion and referenced	Thanks a lot. The title of the article in the mentioned journal “J Family Community Med” is “Prevalence and Risk Factors of Asthma among Wad Medani Basic School Children, Gezira State, Sudan”. This is an important topic but it addressed asthma in school children while our study is targeting pre-school children (age 1-6 years), that is why that article was not taken as a reference.
