PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	1. In figure 1, the chart was blank and nothing was displayed. Peradventure the font colour affected it. So, the correction is paramount. 2. Various level of P values significance were used. But in statistical analysis, it was stated that P values less than 0.05 will be taken as significant. So, the author should review the analysis (where possible and necessary).	Thank you so much for your comments. 1. For figure 1, I really can't explain what happened with the chart, although it was incorporated in the text and also sent as an attachment. I have re-sent as an attachment so it could be incorporated in the text of the final copy. 2. I agree with reviewer on P-values. However, they were just typo errors and have been reviewed as recommended.
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
