PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The manuscript describes a time series analysis of malaria in Bangladesh an important topic. However, the English is bad and the paper poorly written. There are so many grammatical errors which I've tried to correct. In many cases the way a sentence is constructed does not make sense. I've attempted to correct these as much as possible. There are too many figures and the Reference section is also poorly written. The authors would do well to re-write the paper according to corrections made. The Editor should emphasize that the authors should write the Reference section according to the instruction stipulated by the Journal.	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
