New Title of the Manuscript:	THE PREVALENCE OF MALARIA AND HELMINTH INFECTION IN PREGNANCY AT BOOKING AND THEIR RELATIONSHIP TO ANAEMIA AT THE UNIVERSITY OF PORT HARCOURT TEACHING HOSPITAL, SOUTHERN NIGERIA
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
I am satisfied with the authors' corrections. Most of them have been done. With respect to point 1 of my first review (stool sample collection), I insist that it is recommended to analyse multiple serial stool samples for a better and more accurate result. In spite of this, I consider the manuscript is worth publishing.
