PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The influence of antiepileptic drugs alteration as Adjunctive therapy of gingival enlargement – The title does not convey the study design as you have also performed oral hygiene maintenance instead of altering the anti-epileptic drugs. The protocol behind alteration of anti-epileptic drugs in the Group III should be explained in detail. The title and the text explained in the manuscript must be modified according to the study design. Materials and methods have to be rewritten in scientific format. Details about the ethical clearance has to be added. The version of SPSS that was used for statistical analysis should be mentioned. The results have to be summarized. The discussion should highlight the unique findings of your study in comparison with reported literature. Add some latest articles in the manuscript and modify the references accordingly.	
Minor REVISION comments	Many formatting errors and incorrect spacing are present in the word document.	
Optional/General comments
