General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Line 49...there is little or no provision for healthcare workers in Nigeria... This statement is somewhat ambiguous. Little or no provision (of what?) for healthcare workers? Did you mean to say that the number of healthcare workers in Nigeria is grossly inadequate compared to the number of patients? Results (lines 150 – 167) Indicate the table or figure in the body of the results so that the result you have stated can be easily traced to the specific table or figure in which it is represented e.g. if paragraph 1 (lines 150 – 154) is represented in Table 1, then indicate it within or at the end of the paragraph. Limitations Are there any difficulties with the use of these indices? Are they widely used in clinical practice? If there are any such limitations, it would be good to state them.	
Minor REVISION comments	Line 16 under abstract: It should read...comprising (delete "of the") medical doctors, nurses and other health professionals... Line 26 under abstract: It should read...Atherogenic (not Aatherogenic)...	
Optional/General comments	Straight-forward and well-written paper
