Manuscript Number:	Ms_IJTDH_41025
Title of the Manuscript:	USE OF INSECTICIDE-TREATED BEDNETS AMONG PEOPLE LIVING WITH HIV/AIDS ACCESSING CARE IN A TERTIARY HEALTH FACILITY IN SOUTHWEST, NIGERIA
New title of the Manuscript:	USE OF LONG-LASTING INSECTICIDAL-BEDNETS AMONG PEOPLE LIVING WITH HIV/AIDS ACCESSING CARE IN A TERTIARY HEALTH FACILITY IN SOUTHWEST, NIGERIA
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
My comments were not answered in a revised version. L Method of analysis was not clearly explained. Statistical analysis should be done using SPSS or STATA, not Ms-Word. Author only explained how he collected the data but no detail explanation on how to analyse the data since using only statistical analysis of Ms-Word and calculator not a scientific research method of analysis. 2. Objective of the study was to access the usage of ITN among PLWHA, the findings will be more meaningful if the author analyse the relationships between multiple variables such as gender, age distribution, and other variables. 3. What are the efforts of health educator?. 4. In line 67, "have been nationwide free donations of ITN". Need to further clarify the meaning of nationwide and who donate the ITN? 5. Author should discuss the trend of ITN usage with incidence of malaria among HIV/AIDS patients in Nigeria to have an overall impact of ITN on malaria reduction among HIV/AIDS patients.
