PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	I reviewed the Original Article "Knowledge and Practice of Hormonal Contraception among High School Teens". The topic of this Manuscript falls within the aims of the journal. The methodology used by the Authors is appropriate for the purpose of the study and conclusions are narrow linked to data discussion and available evidence. As reported in the manuscript, it is incredible how a good number of high school girls worldwide are sexually active but only a small number is protected against getting pregnant. Referencing should be further improved. In my opinion, this paper can be interesting for the readers of International Journal of TROPICAL DISEASE & Health. For these reasons, I suggest to accept the Manuscript.	
Minor REVISION comments		
Optional/General comments
