PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>The author has to reframe the paper especially introduction and results and discussion. The author has to compare his/ her results with suitable discussion or results from other authors. This presents a vivid view about the results produced and depicts its significance.</p> <p>In serological testing the authors should mention the scheme used in the choice of tests as per the duration of illness or availability of kits.</p> <p>In the current study females are more in numbers and the age group 21 – 30 yrs. has, the maximum positive cases.</p> <p>The presence / absence of this risk factors may be discussed in this age group.</p> <p>The paper needs to be discussed comprehensively, stepwise as per the variables in comparison to other similar studies.</p>	
Minor REVISION comments	Grammatical mistakes lack of proper punctuations	
Optional/General comments	<p>The problem addressed in the paper is one of the hot spot topics. It is a very good effort in depicting the sero prevalence of this disease. But paper needs to be polished a lot before publishing.</p> <p>All results need to be discussed comprehensively.</p>
