Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The study is short and precise but the author did not highlight much about the causative organism, its natural reservoir, its pathology, proper treatment and certain preventive measures. Tables of results should come under results and discussion not after references	Thank you, the aim of our study was to find out the changing in clinical picture, disease course and responses to therapy. And it is not a review article to mention all the aspects so we concentrated in the aim only. We changed the place of table as your suggestion.
Minor REVISION comments	The author should take care of tenses, using reported speech when explaining his/her methodology and results.	We revised the tenses and corrected as your suggestion. Thank you
Optional/General comments	The paper may be accepted if all corrections were made	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)	We added the ethical issues to the manuscript
