PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	In section 2.3 there are a sampling size of 384, it is different for example in each table the sample size is always 388. Please clarify.	The calculated sample size was 384. During the field work i successfully collected samples from 388 pupils/participants, that explains why the figure on the tables is 388
<u>Minor</u> REVISION comments	1. Please include a map with study locations. 2. As your references the most recent document used it is from 2015. Please make a review using most recent references from 2016 until 2018, maybe with three additional recent papers is sufficient	1. Map with study locations included between line 79 and 81 2. Three recent references have been included as requested to support the discussion
<u>Optional/General</u> comments	N/A	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)	Informed consent was gotten from the pupils' parents and/or guardians through a consent form which was sent to them one week before sample collection; to read, understand-ask questions and approve or disapprove their child/ren's participation in the study. The pupils' assent was sought before sample collection. Prior to sample collections a structured questionnaire was filled through an interview.
