

SDI Review Form 1.6

Journal Name:	International Journal of TROPICAL DISEASE & Health
Manuscript Number:	Ms_IJTDH_46127
Title of the Manuscript:	A FATAL TRIO: CONCURRENT INFECTION WITH MALARIA PARASITE, DENGUE AND INFLUENZA A (H1N1) VIRUS TOGETHER.
Type of the Article	Case study

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Please review the manuscript and correct the Scientific names of all species reported in the manuscript and should follow the requirement of the journal as indicated below. Scientific names of all biological creatures (crops, plants, insects, birds, mammals, etc.) should be mentioned in parentheses at first use of their English term. Example: <i>Aedes aegypti</i>, <i>Plasmodium vivax</i>, <i>P. vivax</i>, <i>Plasmodium falciparum</i>, <i>P. falciparum</i> There is no reference in the introduction. Authors should cite their sources for information they are reporting. The same applied for the two first paragraph of the discussion. References should be no more than 20 and should be uniformalised and formatted following the journal requirement.	Done Done. The first Paragraph is a general comment. Since there are three diseases and involves discussion about them we may be allowed the references included.
Minor REVISION comments	Author should revise the manuscript and pay attention to punctuation rules. There should space after a comma, full-stop Months in the text should be reported fully Oct. should be October	Done Done
Optional/General comments	The manuscript reports the first and unique case of concurrent triple co-infection of a single patient with malaria, dengue and influenza A. The case is interesting in the fact that it raises the awareness about such a mixed infection in an area where several pathogens co-circulate. The report is of interest for the scientific and health care communities	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i> Yes. Since the patient died there should be a consent from an authorized person which is not reported here. No ethical clearance was disclosed for reporting this case study.	Consent taken
