

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of TROPICAL DISEASE & Health
Manuscript Number:	Ms_IJTDH_43809
Title of the Manuscript:	Prevalence of Soil-Transmitted Helminthes among School Pupils in Gia and Kajelo communities in the Kassena-Nankana East and West District in the Upper West Region of Ghana Using Direct Wet Mount technique and Formol-Ether Concentration Technique.
New Title of the Manuscript:	Prevalence of Soil-Transmitted Helminthes among School Pupils in the Upper East Region of Ghana Using Direct Wet Mount technique and Formol-Ether Concentration Technique.
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The author(s) have made an effort to do all the corrections indicated in the previous reviews, I therefore recommend that the paper should be accepted after the following correction; Lines 227 – 228 states “The high proportion of children in the study is significant because most studies on helminthes have targeted children between this age group [13]”. Of course all the participants were children since the study involved pupils. This sentence doesn't make any sense and should be deleted or rephrased.
