PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Nice paper. A magnetic resonance with CSF flow image could provide more information on the pathogenesis, just as a magnetic resonance angiography to allow visualiation of dural sinuses	
Minor REVISION comments		
Optional/General comments
