SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p>What was new found in study as higher MPV in depressive disorders was already found before (in your references, also in cohort <a href="https://tandfonline.com/doi/full/10.1080/24750573.2017.1385210">https://tandfonline.com/doi/full/10.1080/24750573.2017.1385210</a>; <a href="https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4610766/">https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4610766/</a> )</p> <p>What is the practical usage of study results?</p> <p>I agree that 5HT receptors influence various biological and neurological processes such as aggression, anxiety, appetite, cognition, learning, memory, mood, nausea, sleep, and thermoregulation but “key role in..(in 8 line) too strongly said (or give reference).</p>	
<b>Minor</b> REVISION comments	<p>Methodology: if participant's psychiatric state (depression, anxiety) was disturbed how they were not on medicines “last month” or it was the first visit to hospital?</p> <p>Did you take in account (made correlation) of MPV with age, gender?</p> <p>Platelet activity (MPV) may be affected also by hyperthyroidism, vit D deficiency, atrial fibrillation, inflammatory bowel, renal, haematological diseases, vasculitis...- do you excluded them?</p> <p>What about 18 reference (in text written author Kokacya but in reference there is Canan)?</p>	
<b>Optional/General</b> comments	Put clear conclusion part
