**PART 2:**

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>This manuscript has been extensively edited and revised. There are still several grammatical errors throughout, but it is in much better form. The newly added sections 7 and 8 are riddled with grammatical errors much as the original manuscript was; the reviewer recommends editing of these new sections. Additionally, the authors cite three new articles in these last sections: is 2014 really the most recent information regarding peptide treatment for cancer?</p> <p>Minor comments: Lines 151-152. Poorly phrased; this section is very minimal and addresses only one reference. Lines 180-182. Poorly phrased; needs revising. Line 303. Extra numbering.</p>
