

SDI Review Form 1.6

Journal Name:	International Research Journal of Pure and Applied Chemistry
Manuscript Number:	Ms_IRJPAC_27100
Title of the Manuscript:	Synthesis, Characterization and Antibacterial studies of some Isoniazid-derived Schiff bases
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	No comments	
<u>Minor</u> REVISION comments	No comments	
<u>Optional/General</u> comments	The authors describe very slightly the bacterial activity of the synthesized molecules, focus primarily on the spectroscopic characterization of molecules, which should not be the focal point of the manuscript. I find no scientific relevance in this work.	The primary focus of the work was the synthesis and characterization of the Schiff bases proposed by a chemist. The biological activity of the compounds adds to the medicinal value of these compounds.
