|                          |                                                                                                                                                     |
|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------|
| Journal Name:            | <a href="#">International Research Journal of Pure and Applied Chemistry</a>                                                                        |
| Manuscript Number:       | Ms_IRJPAC_38221                                                                                                                                     |
| Title of the Manuscript: | <b>A New and Successful Utilization of Aluminum Solid Waste Derived from Aluminum Company in Adsorptive Removal of Nitrates from Water Supplies</b> |
| Type of the Article      | <b>Original Research Article</b>                                                                                                                    |

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:
