

SDI Review Form 1.6

Journal Name:	International Research Journal of Pure and Applied Chemistry
Manuscript Number:	Ms_IRJPAC_31250
Title of the Manuscript:	Chemometric analysis technique for quantitative analysis of atorvastatin calcium in bulk and pharmaceutical dosage form
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Chemometric software was not indicated The standard and tablet solutions should be filtered through 0.22 µ filter.	
<u>Minor</u> REVISION comments	6 line of abstract: 6.4µ mg/mL – 9.6µ mg/mL(should be changed to 6.4µg/mL – 9.6µg/mL) 3 line of introduction: inhibiting HMG- Co reductase (should be replaced with HMG- CoA reductase) 4 line of introduction: UV spectroscopy, HPLC were reported Citations are not presented in the literature survey. Page 3 line 2 the ration acetonitrile (should be replaced with ratio acetonitrile) Table captions should start with capital letters. Units for retention time should be given in the table. Clarity of chromatogram should be improved. Page 14 line 4 of conclusion: good resolution between both the compounds. Because this is single drug there wont be resolution. Incase if it has to be mentioned then it is the resolution of degraded products with the drug.	
<u>Optional/General</u> comments	NIL
