

**SDI Review Form 1.6**

Journal Name:	<a href="#">International Research Journal of Pure and Applied Chemistry</a>
Manuscript Number:	Ms_IRJPAC_40401
Title of the Manuscript:	Accelerated Storage Stability of Refined Cotton Oil in Term of Free Fatty Acid and Thiobarbituric Acid
Type of the Article	Original Research Article

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments	<ol style="list-style-type: none"> <li>1) Conclusion should be improved. Important results from the study may be given to emphasize the aim of study.</li> <li>2) Results need to be compared with more literature data. As far as I have seen, the authors have compared their results with only two studies. More should be added.</li> </ol>	Thanks for appreciation and response for our work
<b><u>Minor</u></b> REVISION comments	<ul style="list-style-type: none"> <li>• Step 3 of refining of oil: Please state the normality and amount of NaOH used for neutralization in this study. "Excess of sodium hydroxide.." is not enough alone.</li> <li>• Line 74: Please revise the sentence starting with "removed thimble...".</li> <li>• Line 90: "Small amount of phosphoric acid...". Please clarify the exact amount.</li> <li>• It would be better to add an induction period data set, if this analysis was performed.</li> </ul>	I will correct this
<b><u>Optional/General</u></b> comments	This is a short but direct and clear paper. In general, the methods and finding are straightforward; however I recommend that authors would better follow above comments.	Thank You Sir
