

SDI Review Form 1.6

| | |
|--------------------------|--|
| Journal Name: | International Research Journal of Pure and Applied Chemistry |
| Manuscript Number: | Ms_IRJPAC_40401 |
| Title of the Manuscript: | Accelerated Storage Stability of Refined Cotton Oil in Term of Free Fatty Acid and Thiobarbituric Acid |
| Type of the Article | Original Research Article |

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|-------------------------------------|--|---|
| Compulsory REVISION comments | <ol style="list-style-type: none"> 1) Conclusion should be improved. Important results from the study may be given to emphasize the aim of study. 2) Results need to be compared with more literature data. As far as I have seen, the authors have compared their results with only two studies. More should be added. | |
| Minor REVISION comments | <ul style="list-style-type: none"> • Step 3 of refining of oil: Please state the normality and amount of NaOH used for neutralization in this study. "Excess of sodium hydroxide.." is not enough alone. • Line 74: Please revise the sentence starting with "removed thimble...". • Line 90: "Small amount of phosphoric acid...". Please clarify the exact amount. • It would be better to add an induction period data set, if this analysis was performed. | |
| Optional/General comments | This is a short but direct and clear paper. In general, the methods and finding are straightforward; however I recommend that authors would better follow above comments. | |
