

Editor's Comment:

The manuscript, once reviewed and evaluated the previous comments of the two reviewers, it is suggested that it be accepted to be published once the following recommendation has been met:

1. Improve the visibility and reading of figures 2 and 3.

As an opportunity for improvement for the research group, it is suggested that in the references, 60% of the total of these be maximum 5 to 6 years ago in their research projects.

Also another opportunity to improve and expand their research and enrich it would be the complementary study of isolated microbial strains with an evaluation of antimicrobial resistance.
