

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Journal of Advances in Biology & Biotechnology
Manuscript Number:	Ms_JABB_40283
Title of the Manuscript:	Premature parturition in a bitch with Visceral Leishmaniasis: Case report
New Title:	Premature parturition in a female dog with Visceral Leishmaniasis: Case report
Type of Article:	Case study

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>The authors correct the majority of the comments.</p> <p>However, there are some sentences that should still be corrected (female instead bitch).</p> <p>The figure 2 may not be necessary.</p> <p>A brief description of the premature parturition may be included (day of parturition, weight of puppies, puppies birth alive? if any other pathology observed in puppies).</p> <p>Why the authors not discarded vertical transmission of Leishmania in puppies.</p> <p>Conclusion should only highlight to premature birth, not for abortion.</p>	<p>Corrected.</p> <p>We believe that Figure 02 should continue in the work because it shows the morphological characteristics of the fetuses.</p> <p>Corrected. Line 95-96 and Line 124-128. It wasn't possible to weight the puppies.</p> <p>Corrected. Line 133-138. We didn't report in our results the vertical transmission of the disease, we only cited other authors regarding this possibility of transmission.</p> <p>Corrected. Line 153.</p>
